Multi-Complex Night Crème

Intensive Anti-Aging Moisturizer

Nighttime moisturizer with retinol, lipoic acid, CoQ10, and skin-firming copper tripeptides. Dramatically improves lines, sagging, and uneven pigment.

Benefits

- Antioxidant skin rejuvenator
- Promotes smoother, healthier skin
- Nourishes skin while sleeping
- Helps improve elasticity, tightens skin and evens skin tone
- Gives a more vital and younger appearance to skin

Featured Ingredients

Retinol: This has been shown to improve elasticity, and even out skin tone. It represents the best-tolerated form of topical Vitamin A.

Copper Enzymes: This beneficial ingredient stimulates enzymes to help build new elastin and to strengthen the epidermis, which leads to improved skin texture.

Alpha Lipoic Acid: This is one of the most potent antioxidants. It helps boost the skin's energy centers. Daily application will help improve skin complexion.

CoQ10 (Ubiquinone): This antioxidant is known to be beneficial in the repair of damaged skin. Topical application promotes a healthier, more vital and younger appearance to the skin.

Directions

After treatment serum, apply to face and neck at night.
